Ongoing Access to Your Practice Fusion data

Practices with an EHR account created prior to March 1, 2018 will have until May 31, 2018 to purchase a Practice Fusion EHR subscription plan. If a plan is not purchased by that date, your account will be transitioned to a "limited access" version of the Practice Fusion EHR, which will only allow you to view, download, and print the EHR data and patient records you previously entered into the system as long as you continue to access them.

¹Washington State prescribers may experience a delay in accessing EPCS as Practice Fusion confirms this service with the state pharmacy authority.
